

Learner Skills & Development Journey

Competency Levels:

- Entry
- Level 1
- Level 2
- Level 3
- Level 4

Within INFRA Skills the ethos is built on people, without skilled and competent people in our workplaces companies will stagnate and inevitably be left behind by their competition.

Our focus is to create and develop the talent of tomorrow, to reach out to those who maybe disadvantaged and lacking in the confidence and self-belief to succeed, by providing the foundation for them to build healthy working careers, or to develop new skills and competencies which move them away from low level and low paid employment.
